

COMPONENT SIDE, USB end of the Arduino at the top. Columns = the numbers printed on the board.
Row 1 = the row next to those numbers. Yellow = solder bridge (solder side).
Grey = bare wire soldered along the pads (solder side). Thin coloured = insulated wire.
Resistors and 1N4148 stand upright in two neighbouring holes; R1-R4 are 1/2 W.
K = cathode (short LED leg, diode band). White dot = PC817 pin 1. Gold = pad joined to a header pin.
